

End-to-End for Finance

Evolving technologies and government regulations are dramatically changing the financial industry. Network systems must be able to securely transmit and store extremely confidential and sometimes very large files – including loan and deposit files – and support sophisticated applications for a wide range of needs from general finances and daily accounting to important investment records.

People working in the financial industry require seamless system performance for “mission critical” types of work such as Electronic Funds Transfers (EFTs). A growing number of investment analysts rely on wireless systems to access up-to-the-minute market reports or record investment notes. Remote access and the ability to consolidate and view investor records at a glance saves time and promotes faster investment banking.

In a highly competitive environment, banking and investment facilities are challenged to balance breakthrough technology and budgets. You need a network that is fast, reliable, secure and scalable. More and more banking facilities are turning to converged networks to manage data, voice and video systems. Administrators are looking for ways to reduce operating and maintenance costs, meet government regulations, offer new ways to improve customer service and more.

Uniprise® Solutions from CommScope® make it possible to implement a structured cabling system that is simple, affordable and ensures quality performance for all your telecommunications needs.

Financial Networks

Uniprise® Solutions by CommScope®

Telecommunications plays an integral role in the financial industry. Your network has to be versatile, fast, reliable and most importantly secure – carrying voice, video and data to branches and global clearinghouses, storing confidential financial records, facilitating secure communications throughout your facility and providing 24/7 access to remote locations. Uniprise® Solutions allow you to manage the necessary connections.

CommScope is your single source for quality solutions, encompassing unshielded twisted pair, fiber and coaxial cables with a wide range of connectivity choices. We provide a simplified suite of products that are designed to maximize flexibility by expanding your options while maintaining performance guarantees.

Uniprise Solutions provide you with reliable, cost-effective, high-performance systems that meet your telecommunications needs today and tomorrow.

Our product design features address the special requirements found in the financial environment. From ease of installation to the flexibility of additions and upgrades, Uniprise Solutions are the right choice for telecommunications infrastructures in the financial industry.

Uniprise® Provides a Wealth of Knowledge and Performance

Uniprise Solutions are backed by more than 50 years of CommScope innovation. In addition, you receive step-by-step guidance and assistance in choosing the right solution for your telecommunications needs from our trained installation contractors, experienced and dedicated technical support personnel and expert field sales staff.

- Optimized Performance: Total Solutions Verification for copper solutions provides ongoing third-party testing through ETL™
- Peace of Mind: 20-year Uniprise Solutions Warranty for all solution components
- Quality Assurance: WebTrak™ online access to test reports shows your twisted pair cable performs as promised; fiber cable features unique identification numbers for tracking purposes
- Knowledgeable Professionals: Over 300 Uniprise Certified Installation Companies
